Experience Summary

18 years

User Experience Design

Engaging in research, analysis, ideation, collaboration, UI design and testing, creating personas, site flows, wireframes of various fidelity, interactive prototypes, style guides, user tests and surveys.

User Interface Design / Development

Creating everything from consumer-facing websites, to company intranet sites and internal team collaboration sites, to Enterprise software tools, including mobile and responsive Web interfaces.

Graphic Design / Art Direction

Creating all manner of graphics for both print and Web, from ads, brochures, magazine layouts, to icons, banners, animations, infographics, and illustrations.

About

An accomplished digital product designer, focused on User Experience, Interaction, and User Interface Design. Works closely with cross-functional teams and is inspired by User Centered Design, the Lean UX process, and the Agile Manifesto. Dedicated to a full, iterative process; from understanding business and customer goals, user motivations and needs, to build/measure/learn process, through to shipped products, and beyond with analytics, user testing and optimization.

Leverages tools such as Adobe CC, Sketch or Axure, Omni-graffle; frameworks such as Bootstrap, Materialize, jQuery and others to design and develop useful and beautiful products that solve real-world business problems. Hand-codes clean and semantic HTML5 and CSS3, while version-controlling work with GIT. Deliverables include wireframes, user personas, site flows, graphical assets, and style guides to interactive prototypes and working, tested, minified, optimized, code. Finally, as a continuous learner, currently focused on SASS, Zurb Foundation, JavaScript fundamentals, and the Lean UX process.

Excelligence Learning Corp	Graphic Designer	2004-2005
Burchell House Properties	Graphic Artist	2002-2004
The Igneous Group	Web UI Designer	2000-2002

Testimonials

“I had the opportunity of working on a new storage system with Jason. He provided much needed and solid direction to the team implementing new administrator GUIs and Field Service GUIs. He set innovative guidelines for GUI development that significantly improved our user interface. Administrators loved it, and Field Service Personnel were more productive. I have been delighted with his contributions to our product.” - **Ken Boyd, VP Systems Development (Seagate Technology)**

“Jason’s insight and design choices were instrumental in the successes of the products on which he worked. His proactive approach with customers allowed for business value designs that were intuitive and focused on business needs. As part of a larger scrum development group, he was able to easily swap between team priorities, directing design efforts and mentoring. He would be a valued addition to any team.” - **Matthew Ring, Senior Manager Application Framework (Seagate Technology)**

“Jason’s ability to translate product management requirements into conceptual user interface deliverables was very impressive. Jason’s collaboration with product management, ability to translate technical conversations and provide a fast turn around enabled our team to provide the user interface framework for complex scale out data storage systems. Jason’s professionalism and passion to bring the new user interface features to market provided significant value to our team.” - **Don Grabski, Director of Product Management (Seagate Technology / Xyratex International)**
